**** The Department of Public Works will go into other Zones if they are ahead of schedule! ****

To help the Department of Public Works do their job efficiently, please remember to use extreme care to ensure there is no foreign debris such as tree limbs, rocks, bottles, etc. in the leaves. These items can cause costly breakdowns of the machine and delays in the pick-up schedule.

Ideally, it is recommended that a fenced holding pen or similar means of containment be devised to prevent leaves from blowing after they are raked. Residents should be aware that the leaves **must** be raked to the curb in order for the vacuum hose to reach them.

To ease the collection process and reduce the risk of fire from automotive exhaust systems, residents are urged **not** to park vehicles in the area near the raked leaves that have been placed in the street.

The Department of Public works will be collecting leaves until the end of January, weather permitting (longer if needed). Also, starting in the month of April Public Works will have random leaf collections for Spring Cleanup.
